

**This information will be kept on file at the child care setting or designated location. It will be used to maintain a cumulative record of immunization status and to identify persons with health problems. This information may also be shared with Region of Waterloo Public Health when an outbreak occurs. Questions regarding this collection should be forwarded to the operator or caseworker of the child care setting. For further information please contact Director of Central Resources at 519-575-4400.**

<b>TUBERCULOSIS SCREENING HISTORY</b>	<b>DATE</b> (Year/Month/Day)	<b>RESULT</b>
<b>One TB Skin Test (not a two-step)</b> TB test required for child care providers and employees within six months prior to commencing employment and is strongly recommended for volunteers who expect to work more than 150 hours/year (one half day per week). No further TB testing advised. Note: Employees working at multiple sites or changing employment in the child care sector within Waterloo Region only require one TB skin test ever; therefore the 6 month requirement would apply only to the first job.	____/____/____	
<b>Chest X-ray</b> If needed due to a positive skin test reaction as recommended by the health care practitioner at the time of testing. A repeat chest x-ray is not required within six months of hire.	____/____/____	
<b>TB skin test may be obtained through your family physician (will charge a fee as advised by the College of Physicians and Surgeons). Alternatively, TB skin testing can be arranged by calling Region of Waterloo Public Health at 519-575-4400 ext. 13005 (fee will also be charged).</b>		

<b>INFECTIOUS DISEASE HISTORY</b>	<b>Immune</b> (history of disease or immunity from vaccine)	<b>NO</b>	<b>UNKNOWN</b>
<b>Working with children may expose persons to a variety of infectious diseases. It is helpful for a person to know if he/she is immune to certain childhood diseases for his/her own protection (as some infections produce more severe symptoms in adults or are a concern to a fetus if a person is pregnant).</b>			
<b>Chickenpox</b> If you are unsure, a blood test can be done to determine immunity. A chickenpox vaccine is now available at your family physician, or contact Region of Waterloo Public Health for more information at 519-575-4400			
<b>Rubella (German Measles)</b> All women of childbearing age should know if they are immune to rubella prior to a pregnancy. A blood test will determine immunity; a routine test during pregnancy.			
<b>Please consult with your physician if you wish to determine your immunity to these infections.</b>			

<b>GENERAL HEALTH</b>	<b>YES</b>	<b>NO</b>
I am presently in good health.		
Any limitations to participation?
