Any hazard assessed as presenting a low and/or medium risk level will be controlled using a combination of controls as appropriate.

Any hazard assessed as presenting a high risk level must be controlled using a combination of at least one engineering control and lower level controls as appropriate. Where this is not possible, Workplace Manager consultation must take place.

Any hazard assessed as presenting an extreme risk level will be controlled using elimination and engineering as the primary source of controls. Where this is not possible, Workplace Manager consultation must take place.

Is the plant designed to perform the task? Yes  No  \_\_\_\_\_

Has the plant been modified from the original condition? Yes  No  \_\_\_\_\_

Is the plant in good working condition and free of weeds & mud? Yes  No  \_\_\_\_\_

All identified action items closed out/addressed (plant checks)? Yes  No  \_\_\_\_\_

Is the plant safe to operate? (On completion of PRA and action closure) Yes  No  Date: \_\_\_\_\_ Signature: \_\_\_\_\_
