

NFI and Emergency Shelter ASSESSMENT / VERIFICATION REPORT

ASSESSMENT: X		VERIFICATION:	
Report Date: 18 August 2014		Assessment/Verification date(s): 17 August 2014	
Location Information			
State		Unity	
County		Rubkona	
Payam		Rubkona	
Boma		UNMISS Base	
GPS Coordinates			
Team Details			
Name	Organisation	Title	Contacts: Email/Mobile/Sat Phone
Aaron Adkins	IOM	Operations Officer	
Emma Flaherty	Concern	Area Coordinator	
Rabih Sarriedine	IOM	Operations Officer	
Summary of Population Type / Numbers			
A. Total population resident in area <i>-Ref Census to County level</i>		Approximately 45,000	
B. Total number of IDPs/returnees <i>-Households and individuals</i> <i>-Ref sources - can be multiple</i> <i>-Specify conflict IDP, disaster IDP, returnee</i> <i>-If returnee, in transit, stranded, or final destination? Organised or spontaneous?</i> <i>-Do registration list/s already exist? Made by whom?</i>		Approximately 45,000 Conflict displaced IDPs. Registration done by IOM.	
C. Total number in need of shelter/NFI assistance <i>-Households and individuals</i> <i>-Specify population type (IDP, returnee, host community)</i> <i>-Verified? List available?</i>		100% Approximately 9,500 HHs.	
Situation Overview <i>-Note any prior assessments (eg IRNA) and attach to this report</i> <i>-If no prior assessment has been done. summarise information gathered through questionnaire at Annex 1</i>			
<p>With ongoing conflict in the area residents of Rubkona County and others remain within the UNMISS PoC seeking safety and access to assistance. Due to heavy rains and low lying areas, the UNMISS PoC has seen a significant amount of flooding affecting some 60-70% of the camp. The current situation poses a threat to all residents wether deemed "vulnerable" or not. IDPs continue to build make-shift dykes but having only soil at their disposal, these dykes fail.</p>			

Summary of Shelter/NFI Situation

-Summarise information gathered through questionnaire at Annex 2

-Include maps and photographs where relevant

- Include any information gathered on community and intra-household gender dynamics, as related to shelter and NFI

All residents of the PoC are in need of protection from flooding for their shelters. These shelters are primarily made with local wood as well as bamboo and plastic sheeting provided by the cluster. It has been found that most shelters contain two or three registered HHs, many of them are predominantly women and children. In this case it is impossible for IDPs to access sandbags locally. All HHs have been served with other NFIs, however in the coming weeks they will need replenishment. Sandbags will provide a quick and easy solution for flooding of HHs and have been specifically requested from community members and leadership.

Assessment/Verification Methodology

-Which assessment/verification methods did you use and why (eg household interview, focus group discussion, shelter observation inside and out, market survey)

-If verifying, are you working from an existing list, or are you creating a list from scratch?

-How many interviews/FGDs/observations did you conduct? What questions did you ask and why?

-Did you use sampling techniques? If so, please describe.

-Is there any information you feel less confident about? If so why?

Most of this assessment has been done simply by visually checking shelters and confirming the extent of flooding. Also, inspecting dykes being made by the community themselves and being requested to provide sand bags to strengthen these dykes.

RECOMMENDATIONS

If emergency shelter and/or NFI distribution is recommended:

Define targeting criteria <i>-need/vulnerability (if vulnerability, define vulnerability categories)</i>	All HHs within the PoC should be targeted for assistance.
Specify items to be distributed <i>-Number and type per household - NFI/ES, full kits, loose items</i> <i>-Specify if quantity of items distributed will vary by household size</i>	It is recommended that 15 sand bags be distributed to each HH. Some HHs are sharing shelters so this number of 15 will surely cover larger shelters as well.
Key considerations for distribution <i>-Eg access, logistics, security and protection concerns, push/pull, stakeholders/partners to work with</i>	Sand bags needs to be filled with soil or sand, in this case Concern is already providing large quantities of soil for the IDPs to access. IDPs need to be informed of this soil access and encouraged to use the sand bags for this purpose.

*If emergency shelter and/or NFI distribution is **not** recommended:*

Summarise reasons and propose next steps, if any <i>-eg referral to other clusters</i>	
--	--

Immediate next steps	Timeline	Who is responsible
Distribution of 15 sand bags to each HH in the PoC	ASAP	Concern/Intersos/IOM

Please submit to IOM Juba (cc your Shelter and NFI Cluster State Focal Point)

If this is a verification report, and distribution is recommended, include:

- 1. Completed Pipeline Request Form**
- 2. Distribution List in excel format**
